01
Motivation

Why the theme changed, and what stayed the same

UNIVERSITÀ DI PAVIA
Department of Mathematics
"Felice Casorati"

MOTIVATION

Content slides keep one clear hierarchy

- A small-caps kicker names the section, so the title can say what the slide shows
- Caladea headings and Carlito body text, as in the PowerPoint template
  - Second level for supporting detail
    - Third level, used sparingly
- The kicker defaults to the current section; change it with `\framekicker{...}`
- The logo, author and short title sit quietly in the footer

One message per slide

KEY TAKEAWAY

Lead with the conclusion, then show the evidence.

- Write the title as the claim, not the topic
- Keep supporting points to three or four
  - Move derivations to backup slides
- Use `takeaway` for the sentence you want quoted back

"Felice Casorati"

Theorem-style cards replace Beamer blocks

DEFINITION

A function $f\colon \Omega \to \mathbb{R}$ is Lipschitz if $|f(x) - f(y)| \leq L\,|x - y|$ for all $x, y \in \Omega$.

THEOREM (RADEMACHER)

Every Lipschitz function on an open set $\Omega \subset \mathbb{R}^n$ is differentiable almost everywhere.

Beamer's own `theorem`, `definition`, `block` and `alertblock` environments use the same cards automatically.

One result, stated in full

THEOREM (BANACH FIXED POINT)

Let (X, d) be a complete metric space and $T\colon X \to X$ a contraction. Then T has a unique fixed point x^*, and the iterates $x_{n+1} = T(x_n)$ converge to x^* from any starting point.

- Grey cards for definitions, maroon-tinted cards for results
- Use this space for a proof sketch or a remark

BUILDING BLOCKS

Cards combine freely

OUTLINE

`outline`: a thin maroon border

ACCENT

`accent=<colour>` tints any palette colour

MAROON

`maroon` for the strongest emphasis

THEOREM 1 (NATIVE BEAMER THEOREM)

$\int_\Omega |\nabla u|^2 \, \mathrm{d}x \geq 0$ *for all* $u \in H^1(\Omega)$.

NATIVE BEAMER BLOCK

Grey card with sans-serif text.

What carried over, and what is new

KEPT FROM THE 2025 THEME

- UniPV maroon and the diagonal title artwork
- `\course`, `sidepic`, `chapter`, `colorblock`
- 16:9 format, Carlito and Caladea

NEW IN THIS VERSION

- Cards, takeaway and result boxes
- Two section styles, chosen once per talk
- Closing slide with generated QR codes

The theme at a glance

2

section styles: diagonal or numeral

4

QR codes generated from URLs

1

option to change the look of every section

UNIVERSITÀ

03

Layouts in practice

Alternative section style. Pick this or the diagonal one, not both.

LAYOUTS IN PRACTICE

A photo carries half the slide

- The picture fills the left side edge to edge
- Text sits on a maroon panel next to it

UNIVERSITÀ DI PAVIA

LAYOUTS IN PRACTICE

Side-picture slides

- The picture fills the right edge of the slide, top to bottom
- Images are cropped to fill, whatever their aspect ratio

“

Mathematics is the art of giving the same name to different things.

Henri Poincaré

UNIVERSITÀ
DI PAVIA

Lead with the conclusion. Let the mathematics back it up.
